MAHI PATEL

Computer Science and Engineering

+91 9879663276 — mahiptl1502@gmail.com — GitHub-mahipatel1502 — LinkedIn

PROFILE

BTech Computer Science student with a focus on AI and Machine Learning. Strong foundation in Python, data analysis, and machine learning basics, complemented by hands-on project experience in full-stack and mobile app development. Passionate about building intelligent systems and continuously upgrading AIML skills.

EDUCATION

Charotar University of Science And Technology (CHARUSAT) 2023 - 2027
BTech in Computer Science and Technology
CGPA : 9.03 (Till 5th Semester)

SKILLS

Programming Languages:	Java, C++, Python, JavaScript
AI/ML :	Pandas, NumPy, Scikit-learn, Feature Engineering Keras, TensorFlow, CNNs, Basic NLP
Web Technology:	HTML, CSS, React Js, Node.js, Express.js, React Native
Database:	MongoDB, Firebase, Supabase

PROJECTS

FakeXpose-AI – Deepfake Detection System (Live Demo August 2025 – November 2025

- Designed a CNN-based deepfake detection system using XceptionNet and MesoNet
- Applied face extraction, data augmentation, and Grad-CAM explainability
- Achieved robust classification of manipulated facial images
- **Technology Used:** Python, TensorFlow/PyTorch, OpenCV, Scikit-learn, CNNs, Docker

PrepIt – Data Preprocessing Platform (Live Demo) January 2026 – February 2026

- Developed an automated data preprocessing pipeline for machine learning workflows.
- Implemented data cleaning, missing value handling, feature scaling, encoding, and outlier detection.
- Designed reusable modules to prepare datasets efficiently before model training.
- **Technology Used:** Python, Pandas, NumPy, Scikit-learn, Fast API, Next Js

Edu-Bridge February 2025-April 2025

- Built a mobile platform connecting students with alumni for mentorship and career guidance
- Implemented authentication, profile management, and real-time data storage
- Improved student-alumni interaction and career awareness through structured networking
- **Technology Used:** React-Native, Node.js, Express.js

RESEARCH WORK

Comparative Analysis of XceptionNet and MesoNet for Deepfake Detection (Manuscript Prepared) 2025

- Conducted comparative research evaluating deep learning architectures for deepfake image detection.
- Trained and evaluated XceptionNet and MesoNet models on the FaceForensics++ dataset.
- Compared performance using Accuracy, Precision, F1-score, and AUC-ROC metrics.

EXPERIENCE

Sparks To Ideas, Ahmedabad May 2025 - June 2025

- Node Js Intern
- Built an Event Management System featuring role-based dashboards and CRUD capabilities.

CERTIFICATIONS

Coursera: IBM Machine Learning	October 2025
Coursera: Python for Data Science, AI and Development	July 2025
Coursera: CNN with TensorFlow: Basics of Machine Learning	July 2025
NPTEL: Database Management Systems	March 2025
